1 Word sets, 426 target classes
English class name: lemon
Translations: limón, citron, limão
False friends: alemán, leçon
Pseudowords: memon, legun, jamet
Anagram, random string: eolmn, wwkvg
Spelling similarity to the name, 0 to 1
2 Lexical review
Native-speaker review
of the Spanish words
Same criteria for the
other four languages
Rejected words dropped,
replacements added
3 Rendering
One word per image,
white box, DejaVu Sans
Photographs of other
classes, shared by all
words of a target
100,096 stimulus images
4 Zero-shot classification
Seven CLIP models; within two
groups, the image encoder is
shared but training differs
1,000 ImageNet classes
Prompt: a photo of a {class}.
512,992 classifications
5 Outcome
Change in log P(target)
relative to a random
string on the same
photograph (nats)
6 Analyses
Reading index
Spelling-similarity gradient
Regressions controlling for
spelling, letter position,
and text-box size
Robustness checks
